

PROFILE

I lead complex, cross functional delivery from a people first perspective, building frameworks that enable great work rather than constrain it. As an agile transformation leader with 25 years across gaming, tech, and enterprise consulting, I bridge the gap between technical teams, commercial partners, and CIO level leaders to keep ambitious projects moving.

I have owned delivery pipelines end to end across console, PC, live entertainment, and risk management inside regulated banks. I balance high level governance with practical, hands on execution in Jira and modern workflows to ensure teams ship reliably.

I adapt my approach to suit the audience, serving as an effective senior interface who protects project scope, provides partner clarity, and drives rapid decision making. I am also an active AI user, helping organisations scale delivery efficiency with the understanding that what holds enterprise AI back is governance, funding, and decision rights, not the tooling itself.

EXPERIENCE

Mar 2026 – Present

Senior Project Manager

Jean Edwards Consulting

Leading client delivery projects end-to-end. Owning scope, milestones and delivery rhythm, and coaching teams toward ways of working that fit them. The same people-first production discipline, applied to enterprise delivery.

Aug 2025 – Nov 2025

Production Manager · Freelance

Nexus Studios

Hands-on production support during critical delivery phases on a fast-moving creative project. Freeing senior leaders to focus on customer liaison and wider project needs while keeping delivery pace.

Feb 2023 – Jul 2025

Senior Producer / Head of QA

Improbable / Imporium (Improbable Venture)

Led production on *Unreal Engine-powered virtual world live events*, each serving thousands of concurrent players in real-time multiplayer. Owned product delivery end-to-end from scoping through live event and iteration. Strategically led and coached the QA team; introduced a QA operating model that improved release quality. Bridged cross-functional teams, aligned vision, and turned delivery chaos into clarity. Collaborated closely with engineering, design, and event partners across each production cycle, building shared ways

of working that kept cross-discipline teams pulling in the same direction. Brought genuine empathy to team dynamics — reading when pace, pressure, or ambiguity was creating friction and adjusting the delivery environment before it became a problem. Shipped 11+ large-scale events including SummerCrush, Halloween, Spacerace, NPC Snatchers, HotShots, Mashup, Game4Ukraine, Beyond the Pitch with Zinchenko, and Clash of Fans.

---

Aug 2021 – Feb 2023

## Senior Development Manager

CCP Games

Led the Missions Team. Redesigned the team's delivery systems and planning rhythms to increase predictability across engineering and design. Introduced frameworks that clarified scope, ownership and progress; lifted delivery consistency across multiple feature streams. Acted as the link between leadership and production, translating creative goals into realistic, trackable outcomes. Reduced production friction by improving tooling, communication flow and alignment across disciplines. Proactively identified gaps in how the team was planning and tracking work, and independently redesigned the delivery system without waiting to be asked.

---

2016 – 2021

## Senior Risk Manager / Product Owner

Lloyds Banking Group

Embedded risk management into engineering and AI teams without slowing delivery. Created and rolled out new digital risk frameworks across the bank, improving clarity and consistency. Advised the CIO and CDO on technology posture. Provided strategic risk guidance that accelerated approvals on major AI and cloud initiatives while keeping teams empowered.

---

2013 – 2016

## Digital Project Manager / Delivery Roles

Accenture (FCA • AstraZeneca • Discovery Channel • others)

Delivered multiple digital projects for global clients through structured rollouts that replaced reactive work with predictable frameworks. Improved campaign velocity by unifying agencies and client teams across shared delivery principles. Reduced project overruns through clearer scope control, better tooling, and tighter stakeholder alignment. The delivery template established here became the standard for future client work.

---

EARLY CAREER • GAMES PRODUCTION (2000 – 2013)

---

May 2012 – Mar 2013

## Lead Producer / Lead Product Owner

Kaplan

Led production and product ownership across the studio's key titles, owning delivery end-to-end and driving cross-functional team alignment.

---

Dec 2011 – May 2012

## Producer

Arooga

Games production across rapid delivery cycle, managing scope and team coordination through to release.

May 2011 – Dec 2011

## Game Director

Zoë Mode

Directed game production at Zoë Mode, overseeing creative and delivery disciplines and driving the project through to completion. Credits include *Grease Dance* (2012).

Jan 2010 – May 2011

## Contracting Producer

Electronic Arts

Contracted producer role at EA, owning production pipeline and milestone delivery. Credits include *Harry Potter and the Deathly Hallows: Part 1 & 2* (2010–11).

Sept 2008 – Jan 2010

## Producer

Hotgen

Production management across handheld and mobile titles, driving delivery from concept through to release.

Jun 2008 – Sept 2008

## Development Manager

nDreams

Development management at pioneering VR and PlayStation Home studio nDreams, aligning team delivery with product goals.

Nov 2003 – Jun 2008

## Associate Producer

Eidos Interactive

Associate Producer across multiple titles at Eidos, owning scheduling, milestone tracking, and cross-team coordination. Credits include *Reservoir Dogs* (2006), *Constantine* (2005), *Conflict: Global Terror* (2005), *Prism: Light the Way* (2007), and *Richard Burns Rally* (2004).

2000 – Nov 2003

## QA / Production

SCi Games

Built a career foundation in QA where attention to detail wasn't optional — progressing from test execution to production by consistently catching what others missed and turning that rigour into process. Started in QA at SCi Games in 2000 and progressed into production. Credits include the *Conflict: Desert Storm* series (2002–03).

28 shipped titles across PS2, PS3, PSP, Xbox, Xbox 360, Wii, Nintendo DS, GameCube, Windows, and Dreamcast • Full credits: [mobygames.com/person/38216/luke-timms](http://mobygames.com/person/38216/luke-timms)
